

everRun® for Government

“One of our servers went down on Christmas day. Thanks to everRun, we never experienced a disruption in our dispatch service. And I didn't have to spend Christmas at the office.”

- Officer Scott Wilder, Brookline Police Department

To maintain public trust, government agencies have to be responsive and operational at all times, especially during disasters and emergencies.

That's why government departments and agencies worldwide turn to Marathon for an affordable, easy-to-implement solution that keeps their critical software applications up and running in the event of system failures. With real-time validation and automated responses to failures, everRun® solutions nearly run themselves, so government employees can focus on serving constituents without the risk of computing downtime. Whether managing emergency call centers, utility systems, public safety systems, aviation security or vital email communications, everRun helps government agencies maintain the public trust with always-on application availability.

BROOKLINE POLICE DEPARTMENT PROTECTS PUBLIC SAFETY AND BUDGETS

The police department in the city of Brookline, Massachusetts, relies on computer-assisted dispatch, arrest booking, detective case management and records management systems to function efficiently and effectively. Marathon everRun keeps these systems running without outage or IT intervention, even during hardware failures.

CITY OF SANTA ROSA KEEPS THE WATER FLOWING SAFELY

The Utilities Department in Santa Rosa, California manages critical water distribution. Fault tolerance and disaster preparedness are essential for a utility in a region prone to earthquakes. Santa Rosa uses everRun to protect its water distribution control system from ordinary faults and problems as well as major disasters. Marathon's everRun technology ensures that water controls continue op-

erating even during outages and failures.

KEEPING COUNTY SERVICES RUNNING WITH EVERRUN

Chester County in Pennsylvania runs systems critical to public safety, like the countywide alert system and 911 call centers. Like many local governments, the county has to make the best use of its financial and people resources, without compromising public safety. Chester County uses Marathon everRun with SplitSite to prevent downtime to its essential applications and keep services running even in the case of disaster.

GOVERNMENT AGENCIES WORLDWIDE USE EVERRUN TO:

- Prevent downtime to critical public safety, aviation safety and building security applications
- Implement disaster tolerance and meet Federal Continuity of Operations (COOP) planning requirements with geographically-separated systems and data
- Minimize the resource costs of maintaining system availability
- Maintain public trust by preventing data loss and downtime

EVERRUN IN NATIONAL, STATE AND LOCAL GOVERNMENTS TODAY

From Bonn, Germany to Brookline, Massachusetts, everRun is the choice for government agencies and departments that need cost- and people-effective approaches to application availability.

WHY DO MORE GOVERNMENT AGENCIES RELY ON MARATHON TO KEEP THEIR APPLICATIONS ALWAYS-ON?

Marathon's preventative approach to application availability focuses on preventing downtime rather than trying to recover from failures after they happen. Marathon everRun® software protects the entire application environment with transparent redundancy, real-time validation, and automated response to failures. It delivers a single, unified and resilient environment for running Windows applications without downtime or data loss.

As experts in application availability, we continually apply what we learn from our more than 3,000 customers to our next-generation application availability software and services. We support applications in the most demanding industries and in environments with limited to no IT resources – consistently delivering solid reliability that our customers count on.

Our innovative everRun software delivers unmatched resiliency and simplicity. Forget about deploying and managing separate, siloed solutions for data, network, and storage availability – everRun delivers a *single operating environment* with unified and resilient resources for application processing. Better yet, this underlying availability environment is completely transparent to the application, so you do not need to modify applications or write complex scripts to make it work.

In a time of increasing IT complexity and “always-on” expectations, Marathon delivers always-on application availability that is simple, reliable and resilient.
